▼ Let us know if the glowies visit you, they will be really busy for the next 4 years, or longer if they try and visit every single person there.

▼ I know you're further up Constitution? I think, but I have not seen a single photo uploaded by people who were there that include the riot control noise machines that were lining every block in the area. Very weird.

▼ If you didn't destroy property and break into the Capital building and/or go inside. You didn't do anything wrong. You have the freedom of speech, and President Trump said nothing to incite any "violence" or tell anybody to do what a few bad apples did. Plus there has a staged group going inside that were being photographed and organized by the Left way before the peaceful unarmed MAGA crowd arrived. Everyone lawful was protected by our Constitution that day.
